SKILLS

Team Player

AI & ML

XR Technology

Game Development

Fullstack Development

HOBBIES

Game design and development, playing with emerging technologies, XR development, AI and Machine Learning.

PROFILE

A software engineer focusing on enterprise development and emerging technologies. Gained hands-on experience in full-stack development through Microsoft internship work with React and FluentUI. Developed XR applications using Godot 4.3 and Unreal Engine 5.4, while contributing to open-source AI development tools. Demonstrated ability to work both independently and collaboratively in diverse team environments.

EMPLOYMENT HISTORY

Technology Intern, Lakeside School   Seattle

Jun 2023 — Present

Led development of Andromeda AI, implementing a school-wide AI platform while managing hardware setup and open-source tool integration. Focused on platform stability and security through regular code reviews and testing. Ensured robust student data privacy protection through careful system design and ongoing monitoring.

Entra GSA Intern, Microsft   Remote

Jun 2024 — Present

Worked with Microsoft's GSA (Global Secure Access) team to develop a web-based migration interface for customer data transfer. Contributed to full-stack development, helping create an intuitive user interface and reliable back-end system. Created detailed documentation and demonstration materials to support the platform rollout.

EDUCATION

Lakeside School   Seattle

Sep 2018 — Present

Currently studying on honors track as a Junior. Unweighted GPA 3.97.
